WORLD-CLASS SILENCERS

2015/16

THE FUTURE OF SILENCE™

Gemtech has been building world-class silencers since 1993. Precision designed and built by owner Greg Latka with a foundation laid on rigorous testing by owner Dr. Phil Dater. Today Gemtech has expanded its capabilities with state of the art tooling, forward thinking engineers and a dedicated staff of weapons enthusiasts. This team of dedicated professionals allows Gemtech to remain at the forefront of innovation and design in the suppressor industry. Gemtech suppressors are deployed with the world's most elite units as well as America's top shooters, weekend warriors, and working law enforcement professionals. The complete line of Gemtech suppressors is very diverse and allows us to fit just about any commercially available firearm.

WORLD-CLASS SILENCERS

GEMTECH SUPPRESSORS REDUCE RECOIL, REDUCE MUZZLE RISE, REDUCE MUZZLE FLASH, AND ALL BUT ELIMINATE THE CONCUSSIVE EFFECT FELT BY THE SHOOTER. THEY ALLOW THE SHOOTER FASTER FOLLOW UP SHOTS AND GREATER ACCURACY. IN ADDITION GEMTECH SUPPRESSORS ALLOW THE SHOOTER TO REMAIN CONCEALED IN HOSTILE ENVIRONMENTS. THE BETTER THE SUPPRESSOR, THE GREATER THESE EFFECTS WILL BE.

LESS FELT RECOIL

A silencer traps the explosive gas leaving the barrel after the bullet. By trapping this gas the shooter has less felt recoil. After training the shooter will no longer anticipate recoil allowing better control of the weapon.

REDUCE MUZZLE RISE

With the gases being trapped by a silencer there is less muzzle rise and better weapon handling with each shot. This enables the shooter to stay on target much easier and not waste time regaining a sight picture. This application is easily applied to the competitive shooter and hunter. In a timed scenario staying on target and quickly dispatching a double tap can greatly increase the shooter's efficiency.

TIGHTER & CONSISTENT GROUPINGS

Modern ammunition is engineered to be as consistent and accurate as possible. A suppressor will typically increase the muzzle velocity of ammunition and maintain, if not improve, shot groups. The silencer enables the shooter to be more accurate by providing a much less violent platform to operate. Reduced recoil, reduced muzzle rise, and overall better weapons manipulation leads to a more accurate shooter.

GEMTECH AMMUNITION

AFTER YEARS OF RECOMMENDING
VARIOUS BRANDS AND TYPES OF
AMMUNITION, WE DECIDED TO DO
THINGS RIGHT AND CREATE OUR OWN.

.22 AMMUNITION

.22 LONG RIFLE

Putting together a heavier bullet, a cleaner powder, and a premium lube on the lead round nose projectile gave us consistent velocities and harder hitting performance at subsonic speed. Harder hitting and “.22 LR” are not usually associated together. The 42 grain lead round nose bullet is heavier than traditionally available rounds and has a great stable trajectory. Steel silhouette shooters will appreciate a knockdown vs. a wobbling target that stays up!

125GR NOSLER BALLISTIC TIP SUPERSONIC

This hunting round has been designed to crush the toughest, wildest beasts with absolutely awesome stopping power and superb precision. Loaded with 125 grain Nosler Ballistic Tip bullets giving this hunting load deep penetration with rapid expansion, our hunting rounds provide not only the ballistic performance that you demand, but also smooth extraction and reliable feeding that intense action hunting requires.

220GR HPBT SMK SUBSONIC

GEMTECH ballistic engineers have maximized the famous Sierra Match King Hollow Point Boat Tail bullet design that provides the extra margin of ballistic performance, accuracy, and stopping power required of tactical professionals in high stress scenarios. It also allows the operator faster follow up shots because of its reduced recoil.

187GR GPP SUBSONIC

This ammunition was created to give the quiet shooter an affordable and dependable training round. It features a 187 grain polymer tipped projectile that provides excellent stopping power, making it a good predator and pest control round. The ammunition is brass cased, boxer primed, and noncorrosive. The low recoil makes it a pleasure to shoot.
